“ The price of greatness is Responsibility. ”

- Winston Churchill

## ⚙️ Core competencies

## 🏆 Certifications

🏆 Microsoft Certified

AZ-305- Designing Microsoft Azure Infrastructure Solutions

AZ-204- Azure Developer Associate.

AZ-900- Azure Fundamentals.

MTA Level-1 .Net Fundamentals.

## 🧩 Personal skills

## 📁 Azure Cloud Platform Experience

- Hands on Experience with **App services, Web Jobs, Slots, Deployments** and Azure VMs.
- Hands on Experience with **Azure Functions apps, Logic apps & KeyVault**.
- Knowledge and Experience with **Azure Storage** blob, fileshare, table and queue.
- Knowledge and Experience with Pub-Sub - **Azure service bus** (queue, topics, subscription) & **Azure storage queue**.
- Hands on Experience with **Azure batch development & Azure Service Fabric**.
- Knowledge of **Azure Event Hub, Azure Event Grid & Application Insights**.
- Deployment using **Octopus** & Powershell with Azure cloud resources and IIS deployment.
- Experience with Azure resources Continuous Integration/Continuous Deployment (CI/CD) through **Azure DevOps** using Ansible, YML, ARM, powershell and deployment templates.
- Experience with Azure resources Continuous Integration/ Continuous Deployment (CI/CD) through **Teamcity** and **Octopus**.
- Hands on Experience with **Azure bot framework** and development of Enterprise ChatBots.
- Profound knowledge of building intelligent bot with **Cognitive Services**.

A Software Professional with 10+ years experience and sound technical knowledge looking for an opportunity to utilize my professional skills. Willing to become a crucial part of the challenging and creative environment by good performance.

## 📋 Professional Synopsis:

- 10+ years of experience as software developer in software design, analysis, development, testing and implementation of web and client server application using Microsoft Technologies.
- Completed B.E. (Computer engineering) from Annasaheb Dange College of engineering with distinction class in May/June 2014.
- Hands on in application development using with **Azure, .Net Core, ASP.Net, Angular, ASP.Net MVC, WebAPIs, Microservices and C#.Net, Java, Console applications, Web forms** in Razor using C# as the code behind language and ADO.NET and LINQ as the database data consumer.
- Experience with C# SOLID principles, dependency injection (Castle Windsor & unity container).
- Experience in design and development of applications using .NET and web technologies CSS, JQuery, Ajax, JavaScript and HTML.
- Knowledge of database designing in code first and database first approach for entity framework.
- Knowledge of Test Driven Development(TDD) using N-Unit, Mock, Fluent Assertions and MS Test framework for testing the Web API, class libraries and C# Console Applications.
- Profound knowledge of ASP.Net, MVC Architecture, Azure and web-development.
- Experience with Agile software development methodologies.
- Code storage, branching and merging experience with Azure DevOps & Git distributed version control.
- Hands on in Azure DevOps, Ansible, YML, Powershell & Octopus Deploy.

## Experience

### **LTI** **Larsen & Toubro** Pune, INDIA

Senior Cloud Engineer

 2022 – till date

- Working for energy & gas client team with various technologies like .Net Core WebApi, Asp.Net MVC, SQL, Git, Azure DevOps and ansible that help to develop high-quality applications for customers.
- Extensively worked on application integrated modules like schedulers, Azure storage blobs, logic app, azure function & app services.
- Worked on developing WebAPIs required for Critical deviation management.
- Conducting the Daily status calls and updating the status of on going tasks on ADO sprints/users stories.
- Responsible for analysis, design, development, and deployment of application as per client requirement and independently working on modules of an application.
- Worked on below technologies.  
C#.Net | Azure | JAVA | Entity Framework | .Net Core WebApi | Azure Functions | React | Logic Apps | SQL | Powershell | Ansible | YML | ARM templates | DevOps

### **WK** **Wolters Kluwer (WK)** Pune, INDIA

Senior Engineer

 2021 – 2022

- Working for Tax & Accounting team with various technologies like WebApi, Asp.Net MVC, SQL, Git, Azure DevOps and Powershell that help to develop high-quality applications for customers.
- Worked on developing WebAPIs required for Taxation.
- Experience on developing Angular components of Integrator and Deploy it on respective environments.
- Extensive experience on continuous integration using Azure DevOps & building PowerShell deployment using Octopus
- Conducting the Daily status calls and updating the status of the project to the counterpart from onshore.
- Responsible for analysis, design, development and deployment of application as per client requirement and independently working on modules of an application.
- Worked on below technologies.  
C#.Net | Azure | AzureDevOps | .Net Core | WebApi | Git | Angular | TypeScript | SQL | Octopus Deploy

### **Tata Consultancy Services (TCS)** Pune, INDIA

System Engineer

 2018 – 2021

- Working for Insurance banking development team with various technologies like WebApi, Asp.Net MVC, SQL, Git, TFS and Active Reports that help to develop high-quality applications for customers.
- Worked on Brokered messaging with external service broker and SSB.
- Worked on middle layer applications which process SQL data that deployed with task schedulers.
- Conducting the Daily status calls and updating the status of the project to the counterpart from onshore.
- Responsible for analysis, design, development and deployment of application as per client requirement and independently working on modules of an application.
- Worked on below technologies.  
C#.Net | Azure | .Net Core | Asp.Net MVC | WebApi | Git | jQuery | TypeScript | SQL | KendoUI

## Cognizant Technology Services(CTS)

📍 Pune, INDIA

Program Analyst

📅 2016 – 2018

- Worked as .Net/Azure Cloud developer for E-commerce platform (Asos Product Replatforming) contains FullFeeds is cloud-based azure batch service that helps to support search teams and other consumers to access .zip file contains all product information.
- FullFeeds runs daily basis and creates zip file that has information about approximate 110K products.
- This product information is in JSON format. Each JSON contains details about the products that can be sold through Asos.com. To generate JSON FullFeeds needs to communicate with various components like MongoDB and few SQL Databases.
- Worked on variety of technologies like WebApi, Console Applications, .Net core migration, Service Bus brokered messaging, Azure batch platform, Azure storage, Schedulers and DevOps.
- Worked on below technologies.  
C#.Net | Azure | .Net Core | Asp.Net MVC | WebApi | Git | VSTS | SQL | MongoDB | Teamcity|Octopus

## ALOHA Aloha Technology

📍 Pune, INDIA

Software Engineer

📅 2015 – 2016

- Worked as .Net Developer with ASP.Net MVC, WebApis and Azure cloud and DevOps engineer.
- Extensively worked on VSTS for continuous integration & continuous deployment for one click deployment.
- Worked on below technologies.  
C#.Net | Azure | SQL | Asp.Net MVC | WebApi | DevOps | VSTS (CI/CD)| Selenium

## ⚽ Hobbies

Swimming | Travelling | Tech.  
Blogging

## 🎓 Education

**Bachelor of Computer Science and Engineering**  
Shivaji University  
📅 2011 – 2014
